

YEARLY DISTRIBUTION OF HARDCOPIES OF HPCA PROCEEDINGS

Dear IEEE Computer Society Member with an interest in computer architecture:

We are revamping the Technical Committee on Computer Architecture (TCCA) by encouraging new members of the community to join and asking the existing membership to update their accounts. Those who join or update their accounts by March 1, 2007 can request a free hardcopy of this year's International Symposium on High Performance Computer Architecture (HPCA). We will repeat this same process every year.

If you are not a TCCA member. Please become a TCCA member by signing up at IEEE's TECA system (<https://eckert.computer.org>). See instructions below on how to do it. Enter your contact information, including physical mail address. Then, if desired, request a copy of this year's HPCA proceedings.

If you are already a TCCA member. Please log into IEEE's TECA system (<https://eckert.computer.org>) and get into the TCCA View (see bottom of screen). Then, check that your contact information is up to date (including physical mail address), renew your membership and, if desired, request a copy of this year's HPCA proceedings.

Please do so by March 1, 2007.

TCCA membership is free but has to be renewed every year.

Soft copies of the HPCA proceedings are as usual available at <http://www.hpcaconf.org>.

Questions? please send email to tccachair@computer.org.

Josep Torrellas, TCCA Chair
David Kaeli, TCCA Vice-Chair
Kevin Skadron, TCCA Publications Chair

Becoming a TCCA Member

Becoming a member of the IEEE Technical Committee on Computer Architecture (TCCA) is free if you are an IEEE member. Follow this process:

1. Go to IEEE's TECA system (<https://eckert.computer.org>) and create a web account if you do not already have one.
2. Once you have it, log in.
3. Check the TCCA box and press Update.
4. To see your TCCA benefits, you need to be in the TCCA View (see bottom of the screen). Your TCCA membership number is your IEEE membership number. Your TCCA membership needs to be renewed every year. If you have a problem, please email teca@computer.org

Sponsored by the IEEE Computer Society TC on Computer Architecture
